

DECLARATION OF HOPE

From the Call of the Wolf

VISION: Mother Earth is a living, conscious being and all its components have multiple interconnections to enable harmonious living. Human beings are part of this cosmic fabric. We, the original people, are one nation and we defend our Mother.

MISSION: Our spiritual understanding of life and love leads us to take a political position and work for our Mother Earth in a way that our spiritual struggle is also a political struggle. It is an opportunity for us to join forces and acquire individual dignity and our rights to a good life.

KNOWLEDGE: Our life is anchored in values, principles and rules that support culture, harmonious collaboration amongst people, equilibrium with nature, and protecting the common good for the benefit of communities, nations and the people yet to be born.

ORGANIZATION: We all are different but our needs are the same; we must link our forces and work together. Our organization is the circle, where we all have a voice. We become one voice and one action in a council that works through consensus. The voice which represents us will be changed at the request of the council.

PROGRAM: We know that there are various different groups and organizations in all four directions of our Mother Earth. We respect them all and we know that it is together that we will achieve our goal. We should share our vision and mission with them. We will spread our words in all our ceremonies.

COMMITMENT: We assume the responsibility to respect and defend our vision and our mission and to share our knowledge, our organization and our actions with the hope of becoming one united nation.
